SERVICES

1) Asset and Debt Issues

Asset and debt issues are those that relate to property and debts that are part of your divorce case. We can help you organize your assets and debts so that you can get a clear picture of what you currently own, as well as what debt you owe.

2) Income and Expense Issue

Income and expense issues are all about figuring out how much money you should be spending. We'll help you calculate how much money is going out each month, then figure out where it's coming from so that your expenses are covered.

3) Fees, Breaches, and Sanctions

Fees, breaches, and sanctions involve making sure you get paid for the work you do on behalf of your client through court proceedings or mediation sessions. In addition to working these cases through the courts themselves, we can also collect information about fees owed to our clients and make sure they're paid on time!

4) Documents and Data

Is there information about your case or business that needs to be preserved for later use? With our extensive experience in California Family Law matters, we are able to provide all of our clients with documents such as financial statements, tax returns, and more!
